PRESIDENT 'S

WELCOME

Technology in the security market today is changing. Bottom line. Look around you. Cameras, locks, doors, card readers, etc.. are now part of the IT network.

With the advancement of technology in the area of crime detection and monitoring, the need for updated applications has become undeniable, which is why we are introducing the IP-based surveillance as a tool in tracking crimes and monitoring movement in public places and private companies

The technology is simple to use and enables the management/organization to view, monitor, reduce and manage situational crimes. With our comprehensive and fully customized reports, the utilization of this system is made easy.

Over the past years, we here at VNILA Services Inc. have developed a conference focused on the emergence of IP-ready physical security technology – we are moving into our tenth year as the premier IT partner in the market that addresses these very questions.

The following white paper is another educational tool available to you to help you build your IP expertise. It introduces to all kind of staff member to some of the gains businesses have experienced through the implementation of IP video surveillance. It also provides a guide to the overall business value of transitioning to IP-based security and suggestions for how to seize these advantages.

If you need to learn the language of IP. Come on, take a look!

President
VNILA Services Inc.

VISION AND MISSION

VISION

Our vision is to create a secured everyday life for our clients to make their customers feel protected while on their premises, campus, restaurant, school, faith-based organization, etc.

MISSION

Provide our clients with the best available technology to fulfill system needs and to thrive on their security demands.

MEET OUR TEAM

Our team members take great pride in being a part of the VNILA Services family, advancing our dedication to help our clients. This is your chance to meet first-hand from individuals across our company. It's your opportunity to get to know our company – and the people who work here – a little better.

Ergueen

Born in SoCal and raised by different world latitudes! Ergueen has an extensive background on international telecommunications, sales, outreach, branding and marketing. Strategist by nature and fluent in 3 languages, Ergueen brings a diverse perspective to the company and knows what truly drives conversions for clients. He's also a volleyball coach and likes to spend time with the family!

Emilio

Software engineering whiz @VNILA spreading nuggets of coding gold related to mobile applications and websites. 8-year member of IEEE, and always aspiring member of The Avengers. He likes to travel around the world and to know different cultures!

Miguel

Miguel is the operations manager of VNILA with an extensive expertise on marketing. Previously, he worked as a marketing manager for a tech software startup. He graduated with honors from Cal State Los Angeles with a degree in Computer Science. Father of 3 lovely princesses!

Raul

As a Field Manager with over 20 years of experience driving installations across different industries. Raul knows how to get the job done during stressful moments! He likes to spend time watching soccer matches and with the grandkids. Big fan of Game of Thrones!

Miriam

Miriam comes from a background with combined experiences, medical billing, NGOs, small business owner, and bookkeeping. Her experience in many fields has made her a well-rounded professional who balances attention to detail and a hard work ethic with a consultative touch. Mother of a Girls Scout and a middle schooler, enjoys TV shows and to spend time with the family!

Diana

Diana has always had a passion for the technology field. She was a PCA for eight years before making the decision to start working for VNILA as an Accounting Staff. She has a wonderful way of adapting to her surroundings, even the most stressful, and using daily applications to solve difficult problems for both clients and staff members. She likes to spend time with the family. Powerful mother of 4!

PARTNERSHIPS

STRATEGIC ALLIANCES help us to maintain our affordable costs that immediately translates to our client's beneficial

Acquire New Clients

Increased market share and market access are the leading reasons businesses seek new partnerships, with 68 percent of executives listing acquiring new customers as a main benefit of effective alliances. Businesses can participate in new supplier-vendor relationships, form ongoing deals with import/export firms and more in order to increase market share and access.

Expand Geographic Reach

Expanding distribution is among the top three benefits sought by businesses entering into partnerships, with 32 percent of executives naming expanding geographic reach as a primary goal of their partnerships. Tightly linked to accessing new customers and revenue channels, geographic expansion is often a first step toward new growth.

Increase Revenue

66 percent of senior executives view increased revenue as a primary advantage of successful partnerships. When their strategic objectives align and their resources complement each other, business partners can provide each other new market access and, in turn, new revenue streams.

BENEFITS

A partnership may benefit from the combination of complimentary skills of two or more people. There is a wider pool of knowledge, skills and contacts.

Access New Technologies

Partnerships are often an ideal way to access new technologies without expending resources. Just over a quarter, or 26 percent, of business leaders list gaining access to new technology or intellectual property as a benefit of strategic partnerships.

Sharing Resources

Along the same lines of accessing new technologies and IP, businesses also enter strategic partnerships in order to pool resources. 23 percent of executives cite adding sharing resources as a primary objective of partnerships, effectively advancing them on their path to innovation.

Extend Product Lines

27 percent of executives list product diversification as a primary goal of strategic partnerships. Businesses often collaborate to gain access to the materials, knowledge or market they need to extend their product lines.

OUR HAPPY CLIENTS

VIRTUAL GUARD

The largest benefit of security monitoring services is the ability to monitor the system remotely and still react in real time to events. Remote guards have three major advantages compared with a traditional human guard:

Savings

Virtual guards are a third the cost of traditional guards, which makes them extremely necessary for any type of business

Effectiveness

Our trained virtual guards can monitor your entire system compared to multiple guards on the ground

Increased Capabilities

The security system they are monitoring can see farther, and better at night, giving them a better view of your site
